

MOS

GENERAL DESCRIPTION

MOS was created as a seating solution designed for installation in conference rooms, where aesthetic simplicity and functionality are paramount.

Aesthetic simplicity is reflected in the straight lines and proportions of the seat, backrest and armrests, which rationalize the image of the space as a whole.

Functionality in an armchair with variable interaxis designed for easy adaptation to any space, in distributions with straight rows, curved rows and slope and in which the work necessary for installation and maintenance is simplified, guaranteeing a long life span of each of the components.

In spite of its straight lines, ergonomic criteria have been used in its design, which are transferred to the manufacture of the seat and back cushions, using variable density polyurethane foams, which provide a high level of comfort.

USES AND APPLICATIONS

Designed for installation in conference rooms, this chair can grow in both aesthetic and functional performance.

- With lateral panel to the floor, made of MDF and finished in beech veneer or fully upholstered.
- With a high backrest that allows to go from a standard height of 87 cm to a height of 101 cm.
- With the incorporation in any of the versions, of a frontally folding anti-panic lectern inside the side or lateral panel.

ECO-FRIENDLY

This product allows the use of upholstery woven with polyester yarns made from recycled PET bottles. In addition, to ensure the closing of the materials cycle, each and every element used in its manufacture can be recycled separately, thus reducing the ecological footprint.
